

# Pregnancy Decision Aid & Rheumatoid Arthritis

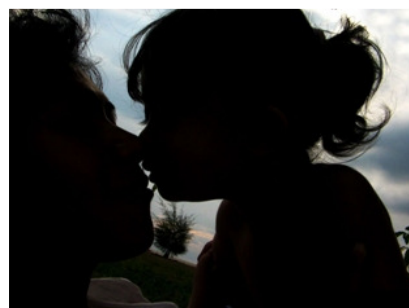

Are you a woman aged 20-45 with Rheumatoid Arthritis?

Are you considering having children or more children?

Or have you decided not to have children?

Then you are invited to participate in a study about how women with rheumatoid arthritis make choices about motherhood.

Participation may involve commenting on a Decision Aid resource OR completion of two questionnaires and a brief follow up telephone discussion.

We aim to develop a Decision Aid resource to help women make informed motherhood decisions in line with their values, needs, and family plans.

Your contribution will help develop this Decision Aid resource, which will be made available to young women nationally and internationally.

*For further information on how you can be involved please contact the project leader or research officer for further information:*
